BOLETIM COVID-19

EDITION No 07 25/03/2021

62 Change recorded and one death by Covid-19

In the last 24 hours, Angola registered 62 new changes, a death and the recovery of 73 patients, according to data from the National Public Health Directorate (DNSP) newsletter distributed yesterday to the press.

The document states that of the 62 new cases, 57 were reported in Luanda, three in Benguela, one in Cabinda and an equal number in Malanje. Those infected are between 3 months and 74 years old, 37 of whom are male and 25 are female. With regard to death, the document reports that it occurred in Luanda. He is a 63-year-old national citizen. Regarding patient recoveries, the note states that they were reported in the provinces of Luanda, Lunda-Norte and Moxico.

With these data, the country accounts for 21,836 positive cases, of which 532 deaths, 20,172 recovered and 1,132 active. Of this number, six are in critical condition, seven are

in serious condition, 41 are considered moderate, 28 have mild symptoms and 1,489 are asymptomatic.

The DNSP note also informs that in the treatment centers of Covid-19, at country level, 87 patients are hospitalized. In institutional quarantine are 78 citizens and 1,050 under epidemiological investigation.

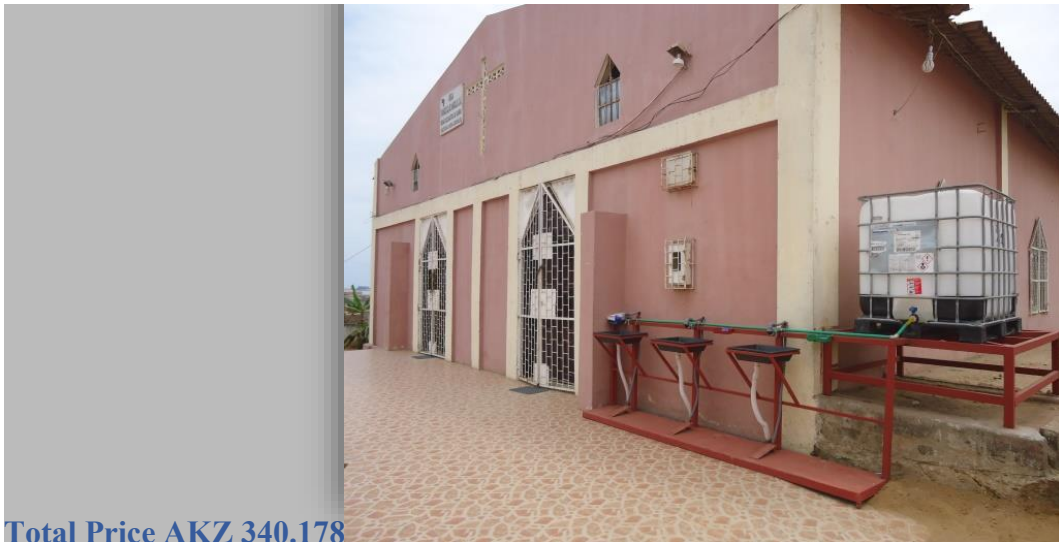

The molecular biology laboratory processed, in the last 24 hours, 1,250 samples, of which 62 were positive. Since the beginning of the pandemic in March 2020, 421,355 samples have been processed, 21,836 of which tested positive. Regarding the rapid testing carried out at the entrances and exits of the province of Luanda, the note from the DNSP informs that 695 passengers were tested. With regard to the vaccination campaign against Covid-19, 87,022 people were immunized until yesterday.
